

Welcome to a pesto, the four wheeled pizza joint serving 'proper', gut friendly wood-fired sourdough pizza.

Our 9" individual pizzas are made the way pizza should be, using the best ingredients and no nasty stuff. Our 48hr fermented 100% sourdough crust is light and won't leave you feeling like you have swallowed a bag of spanners and our tomatoes actually taste like tomatoes, imagine that! Oh, and we even serve all of this in plastic free, compostable packaging, because we actually give a sh!t.

Lastly, with the hope that you're actually reading this, you'll notice we are all about 'inclusive eating', which is why our entire menu uses 'neutral terms' or blanks "...". We feel it's better this way as no matter how you like your pizza or, whether you're vegan, vegetarian etc., we'll always make your pizza, your way, no boundaries, no bull!
